

SEONGMIN LEE

Max Planck Institute for Security and Privacy (MPI-SP)
Universitätsstraße 140
44799 Bochum
Germany

☎ +49 177 783 5480 ✉ seongmin.lee@mpi-sp.org 🏠 [Google Scholar](#)

Research Interests

My research interest lies in dynamic program analysis, especially using statistical methods on dynamic information from execution to reason about a program's semantic properties. The goal of my research is to bring program analysis closer to real-world circumstances regarding the scale and complexity of software within the presence of non-experimental or missing data in the analysis.

Education and Employment

Max Planck Institute for Security and Privacy	Germany
Postdoctoral Researcher, Software Security Research group	Sep. 2022 – Present
Group head: Dr. Marcel Böhme	
Korea Advanced Institute of Science and Technology	Republic of Korea
Doctor of Philosophy, School of Computing	Sep. 2016 – Aug. 2022
Advisor: Dr. Shin Yoo	
GPA - 4.02/4.3	
Bachelor of Science, School of Computing	Feb. 2012 – Aug. 2016
Bachelor of Science, Department of Mathematical Sciences	
GPA - 3.48/4.3	

Publications

Peer-Reviewed Journal Articles

- Seongmin Lee, David Binkley, Robert Feldt, Nicolas Gold, and Shin Yoo. Observation-based approximate dependency modeling and its use for program slicing. *Journal of Systems and Software*, page 110988, 2021
- Seongmin Lee, David Binkley, Nicolas Gold, Syed Islam, Jens Krinke, and Shin Yoo. Evaluating lexical approximation of program dependence. *Journal of Systems and Software*, 160:110459, 2020

Peer-Reviewed Conference and Workshop Papers

- *Danushka Liyanage, *Seongmin Lee, Chakkrit Tantithamthavorn, and Marcel Böhme. Extrapolating coverage rate in greybox fuzzing. In *Proceedings of the 2024 International Conference on Software Engineering*, 2024

Software Engineering Notes

- William B. Langdon, Westley Weimer, Justyna Petke, Erik Fredericks, Seongmin Lee, Emily Winter, Michail Basios, Myra B. Cohen, Aymeric Blot, Markus Wagner, Bobby R. Bruce, Shin Yoo, Simos Gerasimou, Oliver Krauss, Yu Huang, and Michael Gerten. Genetic improvement @ icse 2020. *SIGSOFT Softw. Eng. Notes*, 45(4):24–30, October 2020

Academic Services

- Program committee: ISSTA'24, ASE'23 / (Artifact Evaluation Track) ECOOP'24, USENIX'24, ICSE'24, ISSTA'23, ICSME'22, ICSME'21
- Reviewer: IST'24, TOSEM'22, JSS'21, JSS'20 / (External) FSE'24, ICSE'23, ISSTA'23

Invited Talks

- *Statistical Program Analysis*
Korea Advanced Institute of Science and Technology (KAIST), 2024
- *Statistical Program Analysis*
Ulsan National Institute of Science and Technology (UNIST), 2024
- *Causal Program Dependence Analysis*
Sheffield Causality and Testing Workshop, 2023
- *Statistical program dependence analysis*
Handong Global University, 2022
- *Observation-based approximate dependency modeling and its use for program slicing*
Korea Conference on Software Engineering, 2022
- *MOBS: Multi-Operator Observation-Based Slicing using Lexical Approximation of Program Dependence*
59th CREST Open Workshop - Multi-language Software Analysis, 2018

Grants and Fellowships

- Title: *Statistical Security Analysis for Large, Evolving Software*
Funding Agency: CASA - Cyber Security in the Age of Large-Scale Adversaries
Grant ID: DFG under Germany's Excellence Strategy - **EXC 2092 CASA - 390781972**
Amount: Salary according to the remuneration group E 14 TV-L (full time)
Duration: 2024.01.01 – 2025.12.31

Awards and honors

- **PhD Dissertation Award**, School of Computing, KAIST, 2022
 - *Title of Dissertation: Statistical Program Dependence Approximation*
- **2021 Naver Ph.D. Fellowship Award**: Awarded by NAVER Corp. to Ph.D. candidates who have published an outstanding research paper or have excellent publication performance, 2021
- Government-sponsored Scholarship, Ministry of Science and ICT of Korea, 2016 - 2022
- Government-sponsored Scholarship, Ministry of Science and ICT of Korea, 2012 - 2016

Research Experience

Software Security Group, MPI-SP

Sep. 2022 – Present

Postdoc

Bochum, Germany

- Researching on unbiased estimation of the missing mass/probability/expected number of discovering new classes of unknown multinomial distribution
- Researched on extrapolating the coverage rate of the Greybox Fuzzing using the statistical model – Greybox Fuzzing Extrapolation
- Researched applying statistical methods for program analysis to overcome the scalability issue of the static analysis – Statistical Reachability Analysis

Computational Intelligence for Software Engineering Laboratory (COINSE), KAIST

Sep. 2016 – Aug. 2022

Ph.D. Student

Daejeon, Republic of Korea

- Researched approximating the degree of dependence between program element using causal inference – CPDA
- Researched applying statistical models on the observation data to approximate the program dependence – MOAD
- Researched inferencing the type information in the binary executables using RNN with National Security Research Institute
- Researched classifying the false positive alarms from static checker in continuous integration pipeline using CNN with Samsung Research
- Researched program dependence approximation using the lexical model on the source code – MOBS

Computational Intelligence for Software Engineering Laboratory (COINSE), KAIST

Mar. 2016 – Aug. 2016

Undergraduate Research Intern

Daejeon, Republic of Korea

- Researched on the amortised deep parameter optimisation of GPGPU work group size for OpenCV.
- Accelerated the scalability of Observation based slicing (ORBS) by applying a code distance metric during the slicing.

Programming Language Research Group (PLRG) Lab, KAIST

Jul. 2015 – Feb. 2016

Undergraduate Research Intern

Daejeon, Republic of Korea

- Developed a source code translator from C# to C++ with F#.
- Developed a frontend of Scalable Analysis Framework for ECMAScript (SAFE), a Javascript static analysis tool.

Teaching Experience

- Teaching Assistant, Automated Software Testing (CS453), School of Computing, KAIST, Spring 2019
- Teaching Assistant, Artificial Intelligence Based Software Engineering (CS454), School of Computing, KAIST, Fall 2018
- Teaching Assistant, Introduction to Logic for Computer Science (CS402), School of Computing, KAIST, Spring 2018
- Teaching Assistant, Artificial Intelligence Based Software Engineering (CS454), School of Computing, KAIST, Fall 2017
- Teaching Assistant, Introduction to Logic for Computer Science (CS402), School of Computing, KAIST, Spring 2017
- Teaching Assistant, Special Topics in Computer Science (Search Based Software Engineering) (CS492), School of Computing, KAIST, Fall 2016
